## **INTEGRAL COMPLETION S.A.S.:**

- Offers the products and services provided, having as first priority to give the industry first class products, complying with the requirements established by our customers and safeguarding that the products are delivered in the time frame offered as specified in contracts and quotes with Clients.
- Has implemented efficient policies with his commercial allies for the location of the required products. Also, to obtain the best competitive prices in the market, offering the best quality and guaranties to our Client's satisfaction, for the proper functioning of the equipment and materials provided.
- Have a work team and the experience to provide the technical support needed for helping the Client chose the proper product that he needs. We offer a wide range of products that meet the highest standards of quality for Client's requirements, and adapted to his particular needs.
- Offers integral solutions for the areas of instrumentation, electrical, engineering, transport, consulting, process control, by marketing of equipment, tools, leasing them, technical support and associated services with these areas.

Our Clients satisfaction is guaranteed when asking for any of the products, materials, equipment and services we offer, since we have alliances with the best manufactures in AMERICA-EUROPE-ASIA and the personnel with experience to provide technical and consulting assistance. That is why we provide high quality products with reasonable prices, in the time frame needed by the Client, with great responsibility, dedication and compromise.

We have an excellent team of personnel dedicated to accomplish Client's satisfaction, by making sure that all Clients requirements are fulfilled to their expectations.

# SUPPLIES

## P IPING

Provides pipes and accessories (valves, flanges, etc.) of different sizes and operating pressure for fluids such as steam, water, air, gas, crude oil and derivate for the oil and gas industry and the general industry.

We market the best brands available word while with different specifications as per Client's needs. Pipes with seam or seamless, coated, lubricant oils and grease, repair kits, and other products for piping systems.

GRAPHITE SEAT

FULL PORT  
SPLIT BODY

METAL SEAT

## V ALVES

Markets valves of different ranges in size and pressure, butterfly valves, ball valves, gate valves, check valves, diaphragm valves, plug valves, manufactured in bronze, stainless steel, cast iron, carbon steel, alloys, and resistance to corrosion. Also, we supply well head pressure control piping which comply with ISO, API, ANSI and ASME.

# SUPPLIES

## PUMPS

Offers equipment, products and services for pumping systems with reciprocating or piston pumps, centrifugal pumps, screw pumps and diaphragm pumps, chemical dosing pumps, chucksan pumps, swivel joint pumps and equipment for artificial lifting, technical and maintenance services. We supply the best brands available in the national and international market with the qualified personnel to reduce operational and maintenance costs with a reliable and safe service.

## ACTUATORS, PREVENTORS, SPARE PARTS

The safety and guaranty for a good performance in the operational process are the basis to obtain goods results in any project. That is why we offer our Clients flow control systems, valves and actuators from the best recognized brands available in the market, technical counseling and original parts, so that we guarantee our Client's needs.

# SUPPLIES

## ELECTRICAL EQUIPMENT AND MATERIALS

Supplies the best brands of HV, MV and LV equipment, electrical generators and motors, products, services and technical assistance for industries that will permit them to assure their operational continuity, optimize their efficiency and reduce their operational costs. We offer electrical motors from ½ HP to 5000 HP, switches, controls, protection systems, connection boxes NEMA A, 4X, 7, 7X, CLASS 1, Div 1 & 2, connection accessories and cables as per national and international electrical codes.

## MEASUREMENT, TESTING & INSTRUMENTATION EQUIPMENT

Supplies equipment of high quality, reliability and safety, for testing, measuring, analyzing, controlling and calibrating. We work with the recognized brands in the market to solve design problems and optimize productivity. We product market equipment as Ohmmeters and Microhmmeters, level measurent elements, flow elements, gages, magnetic instruments, flow, pressure and level controllers, and process analyzers. Also voltmeters, Ampermeters and Galvanometers.
